

#### WHAT YOU'LL NEED FOR PEN PLATING by Ann Davis

RECTIFIER: This is what I use, but if you have a higher amp rectifier it will be fine. Just be sure to buy from a reliable supplier so you are sure you can send it back if it doesn't work. (Incidentally, I've had all kinds of rectifiers arrive that didn't work.) Reliable source is more important than a few dollars!

Digital 3amp plating rectifier

PLATING PEN: I also love this product. Midas rules:))

Midas Plating pen and lead

PEN PLATING SOLUTION: Again, I recommend the Acid Solution.

Midas 24k Gold Quick Deposit Pen Plating Solution, Acid Based

LACQUER: This is my favorite lacquer. I've tried everything, and anything similar will work, but this is consistent and stays crystal clear.
